To the Reader.

Eer haste thou Gentle Reader the Rates of the Customs house that is to say, the Subsidie or Poundage for all manner of merchandise as well outwards as inwards, in any of the Quēenes maiesties Portes, Hauens or Creeks, established by an Act of Parlement made in the first yeeere of the reign of Quēene Mary, and at this time standeth in strength.

And where as many things in the former Impressions stood confusedly and so out of order, that a man often times should haue much to doe to finde some things therein contayned: so now maist thou finde any thing herein with small saking, considering not only the first letter of euery name, but also the second letter in the same name. As for example, Abces is the first wherin y^e shall finde A. before B. and the next thing after Abces, is Acalia, wherin is A. before C. and so forth after the order of the Alphabet shalt thou finde it thorow out.

A true discription of Troy Weight and Haberdupois weight.

If xxi. wheat cornes of the midd of the
ear of white wheat being fair full & dry
do make one peny weight.

Item lx. of those pence do make an ounce
weight. And xiiij. of those ounces : make a pound
of Troy weight. And a pound of Troy ma-
keth iij. l. of our silver Coin.

But the Goldsmithes and the Bakers do
reken. xxxij. of the said wheat cornes to a peny
weight, as it hath been in use long time since.

Of Haberdupois Weight.

If Troy weight xiiij. ounces and a halfe
and a half quarter : do make a pound
called Haberdupois weight.

And by this weight men buy and sel y^e moste
part of Merchandise in this Realme, as Lead
Tin, Iron, Copper, Steel, Wax, Wood, Silke,
Thred, Hemp, Flax, Ropes, Tallowe and all
maner of such other merchandises.

And the difference of this weight being tru-
ly reduced into the weights in other Cuntries:
a man may knowe how to make his reconing
the better.
